Leak proof gift vase

# PortoVase

## Leak proof gift vase

PortoVase is a gift packaging for transporting cut flowers in water. The PortoVase allows you to transport a bouquet horizontally, without the water running out.

The PortoVase is easy to fill and keeps the bouquet securely in place during transport. Upon arrival, the bouquet can be displayed straight away without any further operations being required. And once the flowers are past flowering? By removing the bouquet, the inner ring and the absorbent medium, the client will have a vase that can be re-used time and time again.

### CONCEPT

The PortoVase contains a medium that absorbs water and releases it to the flowers. This plastic vase is equipped with a removable inner ring with clutches that keep the bouquet secured in position.

With 0.5 litres of water in the PortoVase, the flowers will be sufficiently hydrated to last a number of days in the shop. The consumer need not cut the flowers again. The PortoVase is available from stock in four colours for bouquets with 25 to 35 stems. Other colours are available on request.

The PortoVase is a ready-to-use gift; a bouquet in a vase with water. For the recipient, at a celebration for example, or a business meeting or in a hospital, this is ideal. The convenience of the PortoVase makes it even more fun to give flowers!

### ADVANTAGES OF THE PORTOVASE

- Quality guarantee: the flowers stand in water and therefore stay fresh
- Stability: stems are secured in upright position
- No leaking: even if the vase is slanted during transport
- Perfect gift presentation
- Can be personalised: different colour or with a label
- A second life as a vase: can be used as a regular vase
