

Leak proof gift vase

PORTOVASE

PORTOVASE

Leak proof gift vase

Advantages of the PortoVase:

- Quality guarantee: the flowers stand in water and therefore stay fresh
- Stability: stems are secured in upright position
- No leaking: even if the vase is slanted during transport
- Perfect gift presentation; ready-to-use gift
- Can be personalised: different colour or with a label
- A second life as a vase: can be used as a regular vase

The PortoVase contains a medium that absorbs water and releases it to the flowers. This plastic vase is equipped with a removable inner ring with clutches that keep the bouquet secured in position.

With 0.5 litres of water in the PortoVase, the flowers will be sufficiently hydrated to last a number of days in the shop. The consumer need not cut the flowers again.

The PortoVase is available from stock in four colours for bouquets with 25 to 35 stems. Other colours are available on request.

The PortoVase is a ready-to-enjoy gift; a bouquet in a vase with water. For the recipient, at a celebration for example, or a business meeting or in a hospital, this is ideal.

The convenience of the PortoVase makes it even more fun to give flowers!

PortoVase is a gift packaging for transporting cut flowers in water. The PortoVase allows you to transport a bouquet horizontally (even upside down!), without the water running out.

The PortoVase is easy to fill and keeps the bouquet securely in place during transport. Upon arrival, the bouquet is ready to be enjoyed without cutting stems or re-arranging.

And once the flowers are past flowering? By removing the bouquet, the inner ring and the absorbent medium, the client will have a vase that can be re-used time and time again.
